

This gift box consists of two parts that are folded almost the same way*** (a simpler option is described at the end of the instructions)

1st Square:

The first module is finished.

2nd Square: folded like the 1st square until step (4).

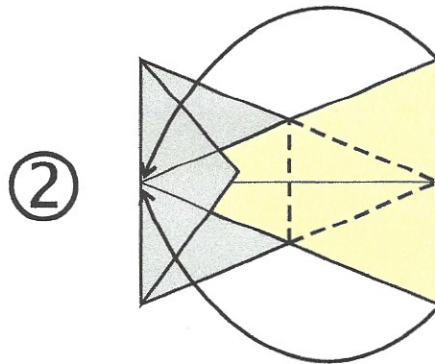

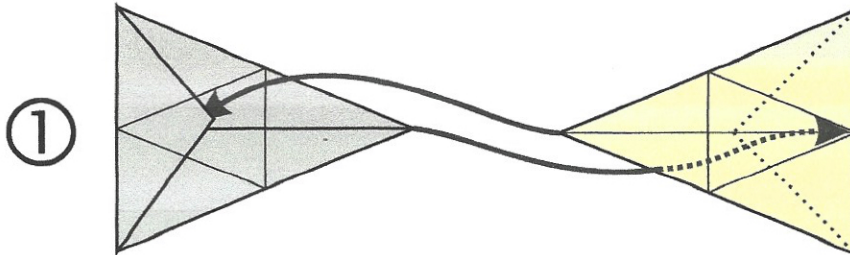

Repeat steps (5) to (10).

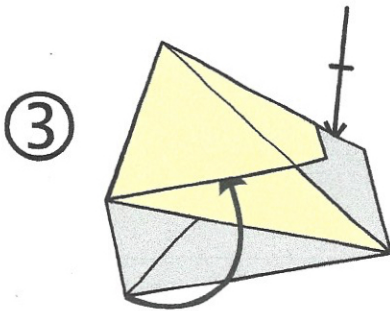

The second module is finished.
Note the difference from (11).

The assembly:

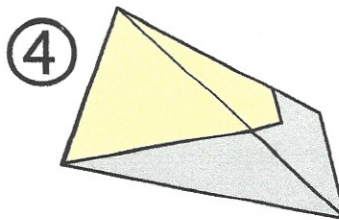

Tuck each tip under the corner of the other module.

Now it will become 3D!

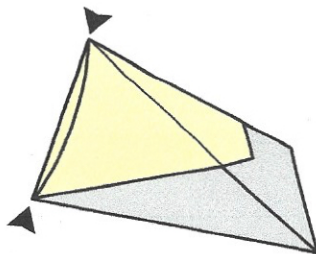

Tuck the side wings of the gray module under the collar of the yellow module.

The model is complete.

Now the box is closed.

To open, press the 2 opposite corners.

Carmen Sprung's original instructions have been translated from German to English by Sheree Green using Google Translate

***Note from Sheree: Alternatively you can fold *both* pieces as instructed for the 2nd square, which makes things simpler. The only difference is that there will be a second small pocket showing on the outside of the model (on the bottom side).
